

The Wildlife Trust of South and West Wales

Pembrokeshire Reserves Work Program - Autumn 2010

The table below is a provisional list of activities on the Wildlife Trust's Pembrokeshire reserves for the Autumn season.

Each practical work day will consist of a brief introduction to the nature reserve and its management, informal training in tool use as appropriate and health and safety issues. This will be followed by a few hours work in the delightful company of other conservationists!

There may be other tasks during the season apart from those listed below and volunteers will be contacted nearer the times.

The task usually starts at 10:00am and finishes around 3:00-4:00pm, depending upon the weather.

You will need working clothes, waterproofs, stout boots and/or wellies, sun cream, hat and a packed lunch.

| Date | Reserve | Task & description | Meeting Point |
